Date: January 2010-01-07

Position: Technical Operator

Job Description:

As one of Scotland's leading post production and new media facilities M8media have an exciting opportunity for a technically minded individual with a self driven creative flair.

You will be involved in corporate and broadcast projects from the production stages, working on location shoots where you will be expected to support the latest broadcast audio and High definition cameras.

The position will require you to support the growing demand for new media where you will be ingesting and publishing content for delivery online or on DVD. A working knowledge of leading graphic applications and your passion for design will be required on a daily basis as you produce artwork and packaging.

Finally a true passion for IT and networking in industry technology is essential as a core responsibility will be supporting our post production facilities.

Experience and knowledge of:

Adobe Photoshop, Adobe After Effects, DVD Authoring Software and Video Editing Software required. Advanced knowledge of the Microsoft Operating system and Networking essential.

A good understanding of all aspects of camera operation and post production would be expected.

Salary:

The Technical Operators position is offered with a competitive salary.
